**Management Tools:** Github, Bitbucket, Unfuddle, Slack, Asana, Basecamp, Zendesk

**Eager to work on:** AI, ML, NLP.

### Experience

#### **Tech Lead**

##### **Triberr**

January 2016 – present

##### **Roles and Responsibilities**

- Frontend / Backend development.
- Database design and management.
- Security implementation.
- Implementing complex and optimized Algorithms
- Build web services for the mobile applications.
- Understand user experience / behavior and come out with the best UX flow possible.
- Design Highly Scalable Architecture
- Manage tech team.

#### **Senior Software Developer**

##### **BitGiving**

January 2014 – December 2015 (2 years)

##### **Roles and Responsibilities**

- Design Highly Scalable Architecture
- Managing end to end development and maintenance of high performance, highly scalable application.
- Managing the full life-cycle development process from product definition, through design, development, test, release and continuous improvement.
- Optimized and simple UI/UX design.
- Application Security & Reliability Management.
- Research, analyze and establish best practices that span all disciplines across the IT infrastructure architecture and development spectrum.
- Understand business need and deliver the required solution.
- High-quality execution, successful team building and retention, and leading positive change.

#### **Software Developer**

##### **Technology 9 Labs**

June 2012 – December 2013 (1 year 7 months)

##### **Roles and Responsibilities**

- Frontend / Backend development.
- Database design and management.

- Security implementation.
- Implementing complex and optimized Algorithms
- Build web services for the mobile applications.
- Understand user experience / behavior and come out with the best UX flow possible.
- Continuously contributing to open source forums like stack overflow, and many more.
- Explored many aspects of security risks an application can face.

### **Intern**

#### **CMC LTD**

June 2011 – July 2011 (2 months)

### **Intern**

#### **HCL Technologies**

June 2010 – July 2010 (2 months)

### **Education**

#### **Bachelor of technology, Computer Science**

**Uttar Pradesh Technical University**

2008 – 2012

**Projects:** Bitgiving, MagicBus, Trailwalker India, Oxfam India, Triberr, 99robots, PageNudge, SpotDraft, HopeCollective, Shoot2Sell, Justdine, Visa Fine Dining, Magtent, TCM, ComicsMV
